Marie Dahl, Larry West, Shirley Joan Ford, Ayaka Sugimoto, Allan Wilbeck, Berna Wall, Velda Lee, Marguerite Graham, Jennine Wilde, Evelyn Thompson, Geraldine Reber, Jean Kitchen, Dorine Hancock, Delbert Gough, Angie Burr and John Paul Redd.

PERFECT ATTENDANCE & PUNCTUALITY
Lorraine Shaw, Mary Roberts, James Hironaka, Lee Fairbanks, Mary Lugas, Gordon Reber, Annie Trembecky, Bessie Shaw, Steele Brewerton, June May, Josephine Litchfield, Jack Ralph Lloyd Kitchen, Raymond Jensen, Sydney Tollestrup, Chiaki O'Shiro, Lloyd Jensen, Joyce Dahl and Lois Fairbanks.

Earl Bascom, one of the popular performers of Alberta Stampedes will not be in the saddle here this year. He is busy helping arrange and advertise a big time in Utah July 24th.

Beet Thinning Crew Finished Wednesday

Thinning over 300 acres of beets, for which they received \$7.50 per acre, the thinning crew which has been working in the beets for the past three weeks or a month finished up Wednesday afternoon and disbanded as a working unit.

At present a great many of these same workers have been hired out to growers to do the weeding of the crop for them and some of them will probably be busy all summer long. They all commenced as novices at the

Il. J. Flock and W. Murphy of the Lethbridge Memorial Funeral Chapel, were Raymond visitors last Monday.

Tuesday was the birthday of King Edward VIII, and a Bank Holiday. The Town Office was also closed most of the day, and the Sugar Factory staff all laid off.

Clark Lund won the money for the best all round cowboy at the Medicine Hat show Tuesday and Wednesday. Herman Linder had some tough breaks and was thrown off.

Principal J. O. Hicken took his grade of Public School students on a picnic to old Fort Whoop-Up on Saturday of last week.

L. D. King returned Friday evening from his trip to Utah. He enjoyed his outing but is glad to be back in Sunny Southern Alberta, which he says is good enough for him.

Mrs. Cecil Hutchinson returned Sunday from a month's visit with relatives and friends in Clarendon. Her father, and other relatives brought her home, and expressed themselves as very well pleased with the splendid condition of the crops which looked much better here than they do in their district, they said.

"Casey" wants us to tell all and sundry that the regular ice delivery Stampede week will be made Monday afternoon, June 29, and special orders will be delivered early on Tuesday morning and Wednesday morning as well. Call 32 for special orders.

Ira McBride returned home Sunday evening after attending the M.J.A. Convention in Salt Lake City. Ira reports a very enjoyable convention and says he is already to go ahead now with the winter Mutual program. He is President of the West Ward.

Hugh Lyne was knocked out for a few minutes Friday when he was thrown over the head of a race horse he was working out at the Stampede grounds. The horse started for a narrow opening, Hugh loosened up to dismount, when the animal suddenly turned and threw him off. He was alright after a few minutes.

Sunday was real warm and dry. Several times during Saturday and Sunday the sky clouded over and it looked like rain, but the clouds evaporated each time without moisture falling. Crops are not burning but more rain is needed to keep them coming on at their best and without damage to them.

All Ready For The Big Show

Let's go folks. The biggest celebration in the history of the Town is coming up next Tuesday and Wednesday. As a shareholder in the interests of Raymond and district it is your business to be there.

There has never been a year when advertising has been scattered so extensively as this year. Every town and village in a circle nearly one hundred miles across has been visited personally by some of the Board of Trade members and committee men, and hills posted and programs distributed. All corals and chutes have been rebuilt anew, and the entire grounds replanned, so that a faster and bigger show can be put on in shorter time than ever before. The race track and arena have been worked incessantly and sprinkled to pack the earth and settle the dust, so that horses and cattle can buck their

News Notes

Rayo Woolf and wife were Cardston visitors last week-end.

Let us have your news items. They make interesting reading for you and your friends.

E. P. Tanner, of Magrath, and R. S. Daxiles, of Logan, Utah, were Raymond visitors Thursday.

The local baseball nine played a double header with Cardston on Sunday, dividing the honors. The game will be returned Dominion Day.

Jerry Gaetz, Manager of CJOX was in Raymond Tuesday in connection with the band speaker arrangements for the Stampede.

L. D. King and Loren Larson were in Cardston on Tuesday afternoon attending the Cardston Stampede and advertising the Raymond Stampede and Race Meet which will take place next week.

A number of our local riders were in the money at Cardston this week, and with the others from outside will strut their stuff here next week.

We know a few people in town right now, who would like 43 hours in each day to catch up a few odds and ends of work.

S. B. Card was in Calgary on business over the week-end and came home ill spending the greater part of the week in bed under the Doctor's care.

If you haven't been inoculated yet it's done while the work is still in progress. It will cost you nothing and the Town would like to see everyone take advantage of the opportunity.

Bishop Walker was the speaker at the Sunday evening meeting in Cardston last Sunday evening, when he spoke on some of his missionary experiences in Holland, and gave the audience a good spiritual address.

Special Council Meeting

ALBERTA CROP REPORT NO. 4

Issued by Alberta Department of Agriculture, Edmonton, June 19th, 1936.

Heavy rains fell in the west central and southern areas from June 6th to 9th, followed in most districts by occasional light showers. The Edmonton zone and the Peace River district had only a few light scattered showers previous to the 15th, when a steady rain of twelve hours or more became general over the whole of the north country. General crop conditions over the Province are now very satisfactory with the exception of the east-central portion north of the Red Deer river to the Hanna Youngstown line where there has been practically no precipitation in the last two weeks.

Weather conditions continue cloudy and cool throughout the Province and higher temperatures would benefit crop development in the east and north. Light frosts have occurred at a number of points with some light damage to crops in one or two districts. Part hail damage of importance for the season is reported in a restricted area north of Lacombe on the 12th instant, where earlier own crops suffered considerably.

Summer fallowing is well advanced in the south though held up for some days in many districts following the heavy rains. Fallowing is now general in the north and all work on the land proceeding normally. Haying of sweet clover and alfalfa has commenced at points in the south, yield of alfalfa being somewhat below average.

Grasshoppers are hatching in large numbers over the southern and east-central districts, but field men of the Department have the situation under control, and mixing stations located at strategic points are applying adequate quantities of poisoned bait. The Department has on hand sufficient supplies for the mixing stations for the entire season's campaign. The heavy rainfall in the south and cool weather conditions have assisted in keeping the situation in hand. Farmers are lending their assistance and co-operation in all districts in applying control measures.

Pasture, though somewhat short on southern ranges is luxuriant over the Province generally, and stock has quite recovered from the effects of the heavy winter. The cattle market continues steady with little change since the Department's last report on June 5th. Hog marketings are increasing, especially in the south with some strengthening of prices.

Steady increase in dairy products continues with a tendency to slight improvement in price. The egg market is good with prices holding firm.

NEWS NOTES

The Star Bowling Alley is opening Monday next under new management. Alterations have been made and decorations refreshed, which with the added equipment will make this quite a recreation centre. Read the ad. elsewhere in this issue.

The fire engine was taken to the Stampede Grounds Friday morning and the arena and the track in front of the Grandstand given a real good soaking to pack the earth and settle the dust. Ed. Hawk, Ross and Loren Larson supervised the work.

A special meeting of the Town Council held Monday evening to re-organize following the sudden death of our respected Mayor, W. G. Meeks, and according to the by-law calling for the choosing of a Councillor to fill the unexpired term, the Council elected S. I. May to act during the term which will expire next February. This necessitated the election of a Councillor to fill the vacant seat, and George Fairbanks was named Returning Officer, with Monday June 29, as Nomination Day and Election, one week later, on July 6th at the Town Hall.

Wm. Jensen was named Deputy Mayor for the next three months.

The Parade Committee asked for another \$5 from the Council to help with the Parade which the Council granted. The 2nd Ward had extended the street sidewalk farther than was at first planned, and they asked the Town to allow them another 12 bags of cement to finish this. The Council agreed.

Because of the lateness of the season, and the division of opinion regarding the Swimming Pool project, the Council voted to hold this in abeyance for this season. If the Ratepayers desire a meeting to discuss the matter and decide on a definite program, the Council will be pleased to join and do their part, but they feel that the next move is up to those who opposed their plans.

As the meeting was a special one, the routine business of the Town was not taken up.

NEWS NOTES

The Stampede chutes and corals are finished, and present the finest looking Stampede equipment of its sort Raymond has ever had.

If you don't get the man you want on the Council who will be to blame. Every registered citizen has equal rights in this matter.

Brewerton's Limited has a Stampede window displaying saddles, chaps, etc., and another one with a bunch of photos of Ray Knight in his younger days of roping, taken in Calgary, New York, etc., Both windows are the centre of a great deal of attraction.

WANTED—10,000 people to attend the Raymond Stampede and Race Meet. Folks, this is your show. Don't be pikers, folks. Attend yourself and invite your friends to come and spend the day here at the Stampede. A wonderful Parade, the best Stampede program south of Calgary, and a dance at night on the finest floor in Alberta. This event needs your financial assistance and the Committees are counting on your support.

J. H. Alfred and S. J. May attended an illustrated showing of the growth and expansion of the Logan Garment Co. plant, their cutting and finishing products, and some films on the making of Rayon, and other goods for knitting, at the Hotel Merquis Thursday night. May and Alfred were also represented in the gathering and were introduced by Dr. H. K. Merrill, Pres. of the Company. Otto Mehr, Manager S. E. Clarke, one of the oldest salesmen on the force, and Mr. Daniels, who will be Manager of the plant if they decide to locate in Southern Alberta. The showing was very interesting and enjoyable. Most of the officials left for their home this morning.

DOMINION DAY

Next Wednesday, July 1st, Canada will have passed another milestone in her history as a nation. What a history she has written since that Dominion Day away back in 1867, when the Fathers of Confederation and the representatives of the British Sovereign signed the necessary papers to constitute Canada an individual unit in the Great Commonwealth of Nations that go to make up the far flung British Empire, possibly the greatest nation ever to grow out of self-governing units and a Commonwealth on whose flag the sun never sets.

It is worthy of note, and good to think about the peace that has attended the gradual but solid and substantial growth of our fair Dominion. Security and peace in a much greater degree than exists in many older countries has always been the part of Canada. Since the early days the Law, as represented by the Mounted Police "the Scarlet Riders of the Plains," has been upheld and respected in a manner and to a degree believed absolutely impossible by many observers. Hundreds of square miles of territory under one detail of police, and yet peace in all its corners, and a swift vengeance on the wrong doer that has bred respect and reverence for the maintenance of the law and those who administer it. Much could be said in praise of the judiciary of Canada.

Few if any nations outside of Great Britain herself, have a better record of law enforcement and administration than has our own fair Dominion. There is no delay in arrests, no red tape in trials, and no political strings pulled in connection with the sentencing of the guilty and the protection of the innocent. Law breakers in other countries have found from other countries have found to their sorrow that it does not pay to monkey with Canadian peace and freedom.

Primarily an agricultural nation, the granaries of Canada have been multiplying steadily, and with them a programme of mixed farming and stock raising that has always tended to stability and contentment. True we have had and will continue to have our problems. But our nation is young. Those who have finished their work and passed on have builded better than they knew. To us of today rests a great responsibility in maintaining unblemished the heritage that is ours. Canada's is a great future. We may not live to see it, but if we do not, and keep her record as clean as it was handed to us, our children and our children's children will share in the wonderful blessings in natural resources, that a wise Creator has concealed just enough that the greedy and avaricious has been unable to find them.

On the Dominion let us contemplate in pride and thankfulness the peace, security and prosperity that is ours in Canada and sing with heart and soul.

"O Canada, our home and native land,
True patriot love in all thy
our command."

FOOD FALLACIES

The American Public Health Association, Year Book 1935—36 contains the report of the Committee on Nutritional Problems. Under the heading food fallacies and nutritional quackery is found some useful information which is here digested to point out to our readers some of the commonly held mistaken ideas concerning foods.

There is an erroneous idea commonly held that nearly every disease and ailment can be cured by some system of dieting. The successful preying on the public by faddists and quacks, in this respect, has assumed alarming proportions.

One of the most common and extensively proclaimed nutritional fallacies is the proteins and starches are incompatible and that they should be separated

into distinct meals. One can look in vain through the writings of authorities in text books and journals for any scientific experimental data in support of this idea.

Investigators and authorities in the field of nutrition are practically unanimous in the opinion that there is no incompatibility between starches and proteins in the diet.

"Acidosis" is a term that is frequently used by purveyors of food fallacies in the exploitation of their books, literature and dietetic systems. Nearly all diseases that afflict mankind are enumerated by them as the result of "acidosis" caused by eating "acid foods."

Acidosis is usually a condition attending certain diseases such as diabetes or kidney disfunction involving a faulty metabolism of the body. The Committee on Foods of the American Medical Association believe that as the term "acidosis" is so little understood its use in public advertising is misleading and is, consequently, disapproved.

There is no evidence to show that a preponderantly acid diet is injurious. The body reaction remains practically unaltered even when a wide range of amount of acid or base is ingested.

The commonly so-called "acid" fruits, such as oranges, tomatoes, and grapefruit, contain certain weak organic acids which are easily oxidized in the body. They really serve as available alkali to the body.

The statement that white meat is less harmful than dark meat has no basis in fact the white of egg is much less digestible when raw than when cooked.

Many reducing menus are erroneously based on the elimination from the diet of individual foods, such as potatoes, rice, cereals and butter. It is not the kind of food which should be restricted, but rather the quality. Beware of food fallacies.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

FEDERAL GRANT OF \$600,000 FOR ROAD LINKS FOR ALBERTA

Federal grants for highway construction purposes will bring coast outlets all the nearer this year for Alberta tourists. At the same time, it appears that completion of these links is still some distance away.

For work on the Big Bend highway section of the Trans-Canada between Golden and Revelstoke, the Dominion will spend \$400,000 this year, thus advancing work to material extent. There is still much building to do on the west side of the highway, however, while it has been estimated that to complete the whole stretch, giving a through all-Canadian route to the Pacific coast, would cost \$2,000,000.

Work on the scenic highway

between Jasper Park and Lake Louise also is being advanced this year, the Dominion having decided to spend \$220,000 or \$110,000 at each end of this project. The government feels that it has been committed to this highway, though it was undertaken by the previous administration, and will gradually bring it to completion.

Of interest to Albertans was the recent announcement that it is likely the Dominion will make an appropriation next year for work on a highway west of Jasper park to link with the road from Kamloops to Blue river. A new route is suggested, however, going by way of Tete Jaune Cache, which would serve a fishing and lumbering territory, besides having many scenic advantages.

The Alberta Motor Association and other Alberta organizations which have fought for years for tourist outlets to the Pacific, welcomed the news of progress programs this year. —Alberta Motor Association

SCHOOL PATROL PLAN INTERESTS A.M.A. BRANCHES

Prepared at all times to take a forefront place in sponsoring safety measures, the Alberta Motor Association branches have been looking into the success of a school patrol system recently inaugurated in Winnipeg.

In the United States these patrols have given highly satisfactory results in the 1,100 cities in which they have been established.

Taking the lead, Winnipeg had placed 50 of these patrols at intersections near 5 schools and is preparing to train 350 more boys for similar duties.

The patrol's duty is to instruct, direct and control members of the student body in crossing the streets at or near the schools.

Each patrol wears a white Sam Browne belt, which is his insignia of office. They are not permitted to have in their possession any signs, signals, flags, sticks or whistles.

Under the standard rules, the patrols are not to be charged with directing vehicular traffic nor be allowed to do so, other than signaling to a motorist who is approaching the crossing after the student pedestrian has left the curb.

One of the chief duties of the patrols is to instruct school children with regard to safe practices in their use of the streets at all times and places.

The Winnipeg system has been outlined to Edmonton and Calgary branches of the A.M.A. with the result that it may not be long before similar patrols are operating in this province. —Alberta Motor Association

Elders Wm. Redd and Wm. Wilde filled their High Council appointment to Tyrell's Lake Branch on Sunday last.

WEEKLY LETTER

CRESTED WHEAT GRASS

A letter came in the Experimental Farm mail this morning asking for advice as to the best way to secure a stand of crested wheat grass for a lawn and on a larger area where it is desired to seed down for pasture. Letters of this kind are received so frequently that it is thought advisable to discuss the seeding of crested wheat grass in this week's letter.

This grass is very drought resistant if it becomes well established, but when in the seedling stage, it is quite easily killed by excessive drought and heat. For this reason, it is best to seed it very early in the spring, the best results are from fall seeding made just before freeze-up, but very early spring seedings are also good. The plants are not as far advanced however, and undoubtedly would not stand hot dry weather so well as those from fall seeding.

Dates of seeding tests made by the Department and reported in the Dominion Department of Agriculture Pamphlet No. 157—N.S. support the recommendation of early spring or fall seedings. Quoting from this pamphlet:

"Crested wheat should be sown as early in the spring as possible. This is an important point which cannot be emphasized too strongly. The next best time to sow crested wheat grass is in the fall of the year. Dates of seeding tests made every two weeks through out the season over a period of three years at Saskatoon, Saskatchewan, have shown that good stands have been obtained every month of the growing season, but seed sown between June 15th and August 15th frequently fails to produce a crop."

For a lawn, the land could be summer-fallowed which would permit it to be well levelled so

as to make a satisfactory lawn. It is well to work the soil down so that it will be firm before seeding. The same treatment is satisfactory for fields, but the matter of controlling soil drifting is important where fields have been thoroughly worked. The lawn should be seeded heavily by broadcasting and raked in and covered with a thin coating of straw or fine manure to prevent drifting during the winter.

A late seeding of grain can be made on larger fields about the first of August for drift protection if fall seeding it to practice, and success has also been obtained from drilling directly into the stubble. The ordinary grain drill is satisfactory for seeding fields. Pasture requires from 10 to 15 pounds of seed per acre, but where planting for seed production, it is usually best to seed in rows about 3 feet apart which requires about 3 pounds per acre. The seed should not be planted more than a half inch deep.

A pamphlet entitled 'Crested Wheat Grass' may be obtained from the Extension and Publicity Branch, Department of Agriculture, Ottawa, which deals fully with the care of this crop.

NEW METHODS FOR CONTROL OF WILD OATS AND DANDELIONS

Northwest Grain Dealers' Association Reports on Results of Experiments.

Development of most modern methods for eradication and control of Wild Oats is outlined in a pamphlet which has just been issued by the Northwest Grain Dealers' Association. The study has been compiled by Dr. G. P. McRostie, Professor of Agronomy, University of Manitoba, and Mr. W. H. Silversides, B.S.A., Assistant on Weed Research. The study indicates that Wild oats are one of the most prevalent weeds in Western Canada.

A further preliminary pamphlet, which will be of great interest to townspeople, has also been issued, dealing with dandelion eradication. The report states that copper nitrate is a practical chemical spray, which will kill the dandelion when it is applied at the proper time and rate. Spudding out the plants, gasoline, fuel oil, and solvent, have been found to be ineffective in the control of this weed. Common salt or copper sulphate may be used with reasonable success. Further research is being conducted into the control of dandelions in arriving at the most effective time for application of the copper nitrate. Copies of this dandelion pamphlet may be obtained by writing to Northwest Grain Dealers' Association, Winnipeg.

Following is a summary of the conclusions arrived at in connection with the control and eradication of Wild Oats.

Wild Oats are a widespread and very serious weed, causing large annual losses to the farmers of Western Canada; the chief means of spread is by the seed, hence the chief means of control lies in the prevention of seed formation. The seeding of Wild Oats with the seed of cultivated crops can be greatly lessened by a more thorough cleaning of the seed with suitable mills, including a careful adjustment of the threshing machine. Where feed containing Wild Oat seeds is fed to animals it should either be ground or the manure from the animals allowed to rot for a sufficient length of time to destroy the germination of the seeds. Control by cultivation is more effective when done after the Wild Oat plant has reached the four leaf stage of development. The control of Wild Oats by the growing of green feed crops is a cheap and effective method where the crop is cut in sufficient time to prevent seeding. The use of a rotation containing a hay and pasture crop greatly reduces the number of Wild Oats on any infested farm.

The line elevator companies have performed very valuable service for the farmers of Western Canada in the weed research work conducted during the past few years. Much valuable information dealing with the control and eradication of weeds has been gained, which has been made available to all farmers.

Copies of the Wild Oat pamphlet may be obtained from any line elevator Agent.

We Print Everything But Money and Stamps

Where City Dwellers Enjoy Holidays

Up in Northwestern Ontario where the game fish grow large and out in a spirited battle, the Canadian Pacific Railway has well equipped chalet-bungalow camps at Devil's Gap, near Kenora, and at French River for the accommodation of fishing enthusiasts from all over the continent. Arrangements can be made, too, to take care of visitors to Nipigon River, another famous resort for game fishermen.

Year by year these favored spots, unspoiled by the civilization from which they are separated by a few short hours of train time, attract more and more visitors. Who camps offer a happy combination of the joys of the great out-of-doors and the com-

forts of the city. At the Devil's Gap and French River Camps, the cabins are lighted electrically, coolly furnished, and have running water. Many of them have shower baths and all have screened verandahs. Efficient maid service is maintained.

Although fishing is the main attraction at the Devil's Gap Bungalow Camp, just a pleasant boat ride's distance from Kenora, other amusements are swimming right at the camp dock, a nine-hole golf course within easy walking distance, and organized excursions by motor boat or canoe over the great stretch of water. The camp will be open a year from June 26 to September 14. A special attraction this year will be the

Old Home Week which will be staged by Kenora from July 6 to the 11th.

The French River Camp provides especially good fishing and golfing. Fighting "muskie," northern pike, large and small mouth bass, "wall eyes," and other game fish are found in abundance. A few years ago a 55-pound "muskie" was taken there and many heavy fish are brought in each season. A picturesque nine-hole golf course is situated on Dry Pine Bay, and there is tennis, swimming, a sandy beach, and dancing at night. The surrounding country provides delightful hiking and canoe trips. The camp will open on June 20 and close on September 20.

Raymond Mercantile

COMPANY LIMITED
THE BIG DEPARTMENT STORE

LET us modernize your kitchen with a new Hotpoint Hi-Speed Range to that you can begin at once to enjoy its savings. You'll find there's less meat shrinkage when you cook with a Hotpoint Range. You can buy cheaper cuts of meat and make them taste just as good. There are no cooling failures and that, too, is a big saving. Cleaning and decorating is greatly reduced for there is no soot, grease or grime. See the complete line of Hotpoint models now on display at our store. HD 33

UNITED GRAIN GROWERS LTD.

ELEVATOR AT RAYMOND

THANKS FIRE BRIGADE

We take this opportunity to thank the fire department and town people who so promptly and willingly responded to the announcement of fire, on our premises Tuesday evening. We compliment the fire brigade for the excellent run they made. Mr and Mrs. A. D. Woolley.

Mrs. Bonnie Nalder is enjoying a visit from some of her relatives from Utah. They will be here until after the Stampede.

Many citizens of the Town have very little respect for the rights of others when it comes to irrigation water. It would be a lovely thing if they would do unto others, as they would that others would do unto them in his matter. How would you like your own garden and yard flooded out by a careless neighbor every week or ten days.

NEWS NOTES

RENEW YOUR RECORDER?

Efforts are being made now to get a woollen mill into Southern Alberta. Watch these columns for details of the progress of the endeavor.

The Prosperity Certificate issue is still claiming a lot of printer's ink, and columns of space. We haven't said much about it because we didn't know much, and we don't yet. When the others get their disputes settled and the Government make a definite ruling on the matter, then we will know what to say and how to say it.

Ross Larson and Bert Nilsson were out Saturday advertising the Stampede, starting at New Dayton, working south to Shelby, Mont., and then turning west to Babb and then back home again through Carway. This will complete probably the largest circle that has ever been covered by direct advertising of Raymond's Stampede.

The year 1936 is half gone nearly. To date prospects are the best we have had for a number of years. Here's hoping they continue. It would be nice to be able to have a few shreds in the old jeans again without wearing pockets out feeling for that nickel.

An item of local interest appeared in a recent issue of the Salt Lake Tribune, a photo of Earl Bascom with his brushes and palette in his art work at the B.Y.U. Earl has certainly made good in his studies in Provo, and is working there now on advertising cards, and expects to take part in a number of rodeos in the Beehive state. When you are passing the Broadway store, stop and read the article.

Newspaper reports state that man of the business firms of Lethbridge have expressed a willingness to accept the proposed "Prosperity Certificates" in exchange for goods and services. Raymond business firms are waiting, and will no doubt follow the lead of larger centers as well as jobbers and wholesalers to whom they will need to turn the certificates to liquidate their accounts.
